## EFNEP Paves the Way for PSE Work

Chrissy Barbrey, EFNEP Educator in Halifax County, is one of three EFNEP Educators piloting Fuel For Life, a brand new EFNEP curriculum, for high school students. One class she is working with has expressed an interest in starting a class garden. This is the perfect opportunity for Steps to Health to assist! Steps to Health will be able to meet with the class coordinator to discuss their plans and needs to get a funding request submitted. Hopefully, they will be ready to start their garden in the spring!

Use the new [PSE Menu of Services](#) for Schools to introduce how Steps to Health can help!

Partner with eligible sites to support their health and wellness initiatives by offering walking challenges and distance signs.
